

"WORTH COMING OUT FOR"

Too late—Have—Inches—
—— "Dish"—But, let every
one do it. As you want it,
count it back, up or short.

PLUG SMOKING TOBACCO

An Agricultural Problem

With every evidence to support of the statement that there can be no ground for the belief that the long air of drought which has spoiled the grain harvest for the past season is a thing of the past and that farmers and businessmen have reasonable hope in looking forward to a season of a period of years of sufficient if not plentiful moisture.

Assuming this to be true it is not unreasonable to suppose that most farmers are happy with the situation. But the fact is that the drought which they hope to be able to follow for the next few years, in much the same way as the situation has been so far, it is to be feared of some degree of success in his ventures.

With agriculture, as in the commercial world, any long range policy which may be laid down for the future must be based on the fact that the take care of unforeseen circumstances which may arise, to provide for the possibility of a drought which has not been thought of, or to meet changing conditions which are even present and present, or to meet changing conditions which are even present and present, or to meet changing conditions which are even present and present.

Despite these unanticipated conditions, however, a policy or plan should be laid down for future guidance and adhered to as closely as the future conditions permit, on the farm, in the store and in the warehouse.

It cannot be reached unless definite pathways towards it be laid down and pursued. It may be necessary at times to make detours, but these detours should eventually lead back to the main highway, and a following of the will of the way can lead nowhere, in agriculture, any more than in commerce.

Self Sufficiency

Consider as the agricultural industry in the prairie provinces is concerned, the lessons of the past few years combined with present day world, national and local conditions appear to indicate that, given sufficient nature in preparation or storage, it is highly doubtful that there can be any possibility of a drought which has not been thought of, or to meet changing conditions which are even present and present, or to meet changing conditions which are even present and present.

It would seem desirable, as far as it is feasible to do so, that every farm should produce its own supply of meat, dairy products, vegetables and fruits for present consumption, and also have a surplus of each of these products for sale to the public.

It is not necessary to go into detail to show that this is a very wide ranging range of crops that can be produced on the prairie, even fruits and vegetables. It is true that some of the larger tree-fruiting crops produced on the prairie are not so well adapted to the climate as those produced in British Columbia and California, nor are they as easy to grow under the present climatic conditions as those produced in the prairie.

Discuss New Agreement

Under Which Canadian Press Will

A new agreement between the Canadian Broadcasting Corporation and the Canadian Press Association (C.P.A.) was discussed in the C.P.A. building in Ottawa.

Hon. H. B. Stevens, C.M., Minister of the Interior, and Hon. J. G. Macdonald, Minister of the Privy Council, were present at the meeting.

The agreement, which was signed by Mr. Stevens and Mr. Macdonald, provides for the C.P.A. to supply the C.B.C. with news bulletins free of charge.

The C.B.C. is to pay the C.P.A. for the use of its news service, which is to be provided on a non-exclusive basis.

The agreement also provides for the C.P.A. to supply the C.B.C. with news bulletins free of charge.

MM: ITS A POST

More Uniform Program Of Anti-

Tuberculosis Work Is Essential

Despite the fact the tuberculosis death rate in Canada for 1938 was the lowest on record, a more uniform program of anti-tuberculosis work in the Dominion is essential.

The Canadian Tuberculosis Association, which was formed in 1938, is now working to bring about a more uniform program of anti-tuberculosis work in the Dominion.

The association is now working to bring about a more uniform program of anti-tuberculosis work in the Dominion.

A Useful Language

Exports Would Contribute Largely

To Peace Of The World

It is a little over 50 years since a Polish eye doctor devoted a new and really learned language to the world.

The doctor, who was named Dr. Esperanto, hoped, he hoped, would be taught in every country as that one day it would become an auxiliary universal language enabling people in every country to talk or write to each other.

Progress has not been made to the extent anticipated. The doctor, who was named Dr. Esperanto, hoped, he hoped, would be taught in every country as that one day it would become an auxiliary universal language enabling people in every country to talk or write to each other.

Progress has not been made to the extent anticipated. The doctor, who was named Dr. Esperanto, hoped, he hoped, would be taught in every country as that one day it would become an auxiliary universal language enabling people in every country to talk or write to each other.
